Five Steps to Protect Your Firm from Catastrophic Cyber Attacks

Total: **57 Minutes**

Speakers:
Tom Kirkham

Description/Table of Contents

Cyber attacks have become increasingly commonplace in today's digital world and law firms, no matter how small, are often targeted in these destructive and expensive schemes. In this program, you will learn the 5 critical steps needed to protect your law firm and client data from malicious cyber attacks. These crucial steps will dramatically increase your overall security stance and will lessen the chances of you becoming a victim to cybercriminals.

Topics include:

- RPC ethics and confidentiality (10 min.)
- Understanding the issue (10 min.)
- Cybersecurity insurance issues (7 min.)
- Cybersecurity frameworks (15 min.)
- Tips and tricks: MFA, EDR, and more (10 min.)
- Improvements and security teams (5 min.)

Total: 57 minutes
