Information Governance for Legal Practitioners – a Guide to Discussions with Clients

Total: **60 Minutes**

Speakers:
James Sherer

Description/Table of Contents

Information governance is a key component of modern law practice, and having a good working understanding of it can make your practice more efficient and successful. This program will cover information governance as it relates to lawyers, covering topics such as records management, data governance, and the EDRM. The program will also discuss program building, information remediation policies and techniques, and the future of data management, including AI, new applications, BYOD, and work-from home issues.

Topics include -

- Introduction into information governance as it relates to lawyers (12 min.)
- How to defensibly let go and delete information (10 min.)
- Future-state of data management (10 min.)
- AI, new applications (10 min.)
- BYOD (10 min.)
- Work-from-home issues (8 min.)
