FORM 3 OF 6

Witness Language Audit

The Camera Test for transcripts. Review prep or mock-exam transcripts and flag language that frames the event for the other side.

Witness:	Case / Matter:	Date / Session #:

TYPE CODES L = loaded label A = absolute (always, never, completely) M = minimizer (just, barely, only) H = hedge (I think, maybe, sort of) N = unsupported number

#	Quote from transcript (page:line)	Type	Camera-test rewrite (what a camera recorded)	Re-test: said cleanly?

Guardrail: Accuracy first. The rewrite is specific and literal, never softer and never harsher than what actually happened. Example: “He attacked me” becomes “He stepped toward me and grabbed my left arm.”
